PERFORMANCE ASSESSMENTS

INSTRUCTIONS

The Engineer Position Task Book requires, at minimum, 7 performance evaluations to be completed in addition to the sign off assessments contained in the above qualification record. The performance assessment forms that follow are for the documentation of performance. These assessments may be made on incidents, simulation in classroom, or in daily duties depending on what the performance assessment indicates. In most cases, if the individual is adequately prepared, this assessment process should be sufficient in determining a trainee's ability to be successful in the corresponding evaluation. If additional training is needed, individuals should communicate this to their company officers prior to the start of the evaluation process.

COMPLETE THESE ITEMS AT THE START OF THE PERFORMANCE ASSESSMENT PERIOD

Trainee Name, Employee No. and Assignment: List the name and employee number of the trainee and the current position of assignment.

Evaluator's Name and Title: List the name and title of the evaluator.

COMPLETE THESE ITEMS AT THE END OF THE PERFORMANCE ASSESSMENT PERIOD

Numbered Check boxes: Place a check in the appropriate checkbox for the specific objectives completed.

Recommendation: Check as appropriate and/or make comments regarding the future needs for the development of this trainee.

Comments: Provide comments identifying any future needs for the development of this trainee.

Date: List the date the evaluation is being conducted.

Evaluator's Initials: Initial here to authenticate your recommendations and to allow for comparison with initials in the Qualifications Record.

#7 Multi Company Drill

Objectives: Demonstrate the ability to:

1) Perform attack pumping evolution (initial attack)

- a) Safely and appropriately spot apparatus
- b) Establish hose line(s) with tank water to objective.
- c) Obtain continuous water supply.
- d) Confirm a continuous water supply through communication with supply engineer, IC and/or attack crew.
- e) Establish correct pump pressures for operations.
- f) Set discharge relief valve or pump governor.
- g) Troubleshoot problems that may arise.
- h) Complete all tasks assigned safely.
- i) Communicate effectively with crew members.

2) Perform supply pumping evolution.

- a) Safely and appropriately spot apparatus
- b) Obtain a continuous water supply.
- c) Set up a supply line to supply attack apparatus or to supply fire department connection.
- d) Confirm a continuous water supply through communication with attack engineer.
- e) Establish correct pump pressures for operations.
- f) Set discharge relief valve or pump governor.

The trainee has performed the tasks under the supervision of the evaluator and the evaluator attests, by signature below, that he/she has assessed the performance of the trainee. The evaluator makes the following recommendation for the trainee:

- ☐ The individual has successfully performed all tasks for the position and should be considered for certification.

- ☐ The individual was not able to complete all tasks and additional assignment is required (see comments).

- ☐ The individual was not evaluated on all tasks and additional assignment is needed to complete the evaluation (see comments).

- ☐ The individual is deficient in the performance of the tasks and must complete further training (see comments).

CALIMESA FIRE DEPARTMENT EMPLOYEE DEVELOPMENT PROGRAM

I. PERFORMANCE BASED SYSTEM

The Calimesa Fire Department Employee Development Program is a “performance based” system. This system is one in which the primary criteria for qualification is individual performance as observed by an evaluator using approved standards. The Employee Development Program utilizes Position Task Books as the primary tool for observing and evaluating performance. They contain the “approved standards” in the form of tasks, which have been established by industry standards.

Position Task Books have been developed for designated positions within the Calimesa Fire Department. Each position task book lists the performance requirements (tasks) for the specific position in a format that allows a probationary Battalion Chief or trainee to be evaluated against written guidelines.

IMPORTANT NOTE: Position task books are designed with a specific focus on a particular position, and therefore contain a narrower set of skills and knowledge than may be necessary to be successful in that position. As a result, each position task book includes a *presumption* that the probationary Battalion Chief or trainee has the requisite knowledge of the position subordinate to the task book being initiated. For example, the individual who initiates a Battalion Chiefs Position Task Book must have the knowledge, skill, and ability contained in the Captain Position Task Book to successfully complete the Battalion Chief position tasks.

II. USE OF THE POSITION TASK BOOK

The position task book will be used during completion of the employee’s probationary period (the post promotion process) to verify the employee’s performance meets the requirements of the position promoted.

III. TIME FRAME FOR COMPLETING THE POSITION TASK BOOK

Completion of the position task book is required to be completed and submitted 30 days prior to the end of the probation period. Final determination of position task book completion time frame lies with the Deputy Chief.

IV. RESPONSIBILITIES

NOTE: The list below contains only a summary of the responsibilities for the various participants in the Employee Development Program. For complete details refer to the Employee Development Program Administrator’s Guide.

A. The Department

- 1) Establish and implement the Employee Development Program.
- 2) Maintain the program to meet current Department needs.

B. The Training Division

- 1) Issue Position Task Books to document task performance
- 2) Explain to the employee the purposes and processes of the Position Task Book as well as the employee's responsibilities.
- 3) Confirm Position Task Book completion.
- 4) Determine certification per Department requirements.
- 5) Conduct a closeout interview with the employee and the evaluator to ensure that documentation is proper and complete.

C. The Evaluator (Training Battalion Chief / Fire Chief)

- 1) Be qualified and proficient in the position being evaluated.
- 2) Meet with the individual and determine experience, current qualifications, and desired objectives and goals.
- 3) Review tasks with the individual
- 4) Explain to the individual the evaluation procedures that will be utilized, and which objectives may be attained.
- 5) Identify tasks to be performed during the evaluation process.
- 6) Initialize and date the tasks completed and evaluated.
- 7) Complete the evaluation record found at the end of each Position Task Book
- 8) Sign the verification statement inside the front cover of the Position Task Book when all tasks have been completed and initialed.

D. The Individual (Probationary Battalion Chief)

- 1) Review and understand the instructions in the Position Task Book
- 2) Identify desired personal objectives and goals.
- 3) Satisfactorily complete all tasks for an assigned position
- 4) Assure the evaluation record is complete.
- 5) Notify the Training Division when the Position Task Book is completed.
- 6) Maintain a copy of the completed Position Task Book in the individuals training file.

V. PREREQUISITE RECOMMENDATIONS

A. The Probationary Battalion Chief Position Task Book requires the foundational knowledge, skills, and abilities of the following position task books:

- 1) Fire Captain

EVALUATION RECORD

INSTRUCTIONS

The Battalion Chief's Position Task Book requires four performance evaluations to be completed in addition to the sign off assessments contained above. The four separate pages below are for the documentation of these performance evaluations. These evaluations may be made on incidents, simulation in classroom, or in daily duties, depending on what the evaluation indicates. In most cases, if the individual is adequately prepared, this evaluation process should be sufficient for determining a trainee's qualification in the position. If additional blocks are needed, a page can be copied from a blank task book and attached.

COMPLETE THESE ITEMS AT THE START OF THE EVALUATION PERIOD:

Trainee name, Employee

No. and Assignment: list the name and employee number of the trainee and the current position of assignment)

Evaluator's name and title: list the name and title of the evaluator.

COMPLETE THESE ITEMS AT THE END OF THE EVALUATION PERIOD:

Numbered Check boxes: Place a check in the appropriate checkbox for the specific objectives completed.

Recommendation: Check as appropriate and/or make comments regarding the future needs for the development of this trainee.

Comments: Provide comments identifying any future needs for the development of this trainee.

Date: List the date the evaluation is being conducted.

Evaluator's Initials: Initial here to authenticate your recommendations and to allow for comparison with initials in the Qualifications Record

CALIMESA FIRE DEPARTMENT

POLICY MANUAL

VOLUME 6

Policy: 606.04 Apparatus Operator Certification

1/2024

Page 1 of 1

PURPOSE AND SCOPE

The purpose of the Apparatus Operator Certification Guideline is to standardize and maintain the testing process for apparatus certification.

STANDARD

Personnel must possess a California Class C driver's license (EFF Endorsement) to drive any vehicle over 26,000 lbs. gross vehicle weight outside a training environment. A learning permit can be secured from the Calimesa Fire Department and must be in possession prior to driving fire apparatus during the training period.

Personnel will advise the Training Chief, via chain of command, of a desire to be certified on a specific apparatus by filling out a written request signed by their supervisor.

Certification on a Type 3, Water Tender, Engine, Truck and Patrol will require successful completion of each Apparatus Certification Task Book for that specific apparatus.

CALIMESA FIRE DEPARTMENT

POLICY MANUAL

VOLUME 6

Policy: 606.05 Apparatus Certification Task Book

12/2023

Page 1 of 20

STANDARD

The following items are required to obtain a department certification to operate apparatus and equipment. Once completed, this checklist serves as verification that an apparatus operator is certified to operate the indicated apparatus and equipment. Each item is to be completed by the employee then reviewed and initialed by the Training Chief with the final signature by the Fire Chief.

Verification of Driver Certification for (mark one only)

- ☐ Type 1 Engine
- ☐ Type 3 Engine
- ☐ Patrol
- ☐ Water Tender
- ☐ 100' Aerial Truck

CALIMESA FIRE DEPARTMENT

POLICY MANUAL

VOLUME 6

Policy: 606.05 Apparatus Certification Task Book

12/2023

Page 2 of 20

Trainee's Name: _____

This training book has been developed for new Driver/Operator training for the engines, patrol, water tender, type 3, and truck. You will be offered direct training, self-study time, hands-on training and other training that is needed to assure that you can effectively operate any engine or brush patrol within the Calimesa Fire Department. You will be evaluated by performing tasks manipulatively, verbally, or in a written form. All the items that you will be trained and evaluated on are contained in this task book, equipment specification books, DMV regulations and Department Policies. To achieve completion of this task book, you must successfully demonstrate the ability to operate and maintain all equipment on the apparatus and complete ALL task and job performance to the evaluator's satisfaction.

This task book serves as a general guideline. As such, it is not intended to replace specific sequences of apparatus or equipment operation that may be outlined by the manufacturers' specifications. Training shall follow Fire Department Policies. If you are unsure about the safe operating principles and limitations of the specific make of the engine or brush patrol training on, consult the manufacturer's operation manual. In the case where you cannot find the needed information, ask the person providing the training for assistance. The bottom line is train safe, practice safe, study safe and research the information immediately when the question is fresh in your mind. Remember the manufacturer specifications must be followed in most cases for them to honor the warranty. Should additional assistance be required contact the assigned Captain for assistance. **DO NOT** contact the manufacturer directly.

This training book is designed to be completed within one year and must be completed before being signed off on your drivers' certification. If the training book is **NOT** completed in the specified time an extension will be made by the Training Chief

Trainers are to ensure that all information, including dates and hours, is recorded accurately in the task book. ALL Driver/Operators **MUST** have all required driver's licenses prior to performing any driver training.

Information should be regularly assigned to an engine and shall ensure that all information including dates and hours of training is recorded accurately on the training log.

CALIMESA FIRE DEPARTMENT
POLICY MANUAL
VOLUME 6

Policy: 606.05 Apparatus Certification Task Book

12/2023

Page 3 of 20

Trainees must have a current, applicable license or permit in their possession prior to performing any driver training and must be available to be reviewed by the training Captain. This information should be entered on the certification sheet found on page three of the task book.

The trainee's Captain/Officer must certify successful completion of each portion of the task book, including pre-trip, rodeo, street driving, and code 3 operations.

When all needed information has been documented, the captain must certify successful completion of the task book.

The Training Captain must then certify successfully training completion prior to forwarding to the Chief for final review.

Once the task book has received final review by the Chief, the training Captain will retain the certification sheet and training log originals. The remaining portion of the task book will be returned to the trainee for future reference.

Each piece of equipment will require a set number of hours before the Firefighter can be signed off on that equipment.

Engine	25 Hours
Type 3	25 Hours
Patrol	10 Hours
Water Tender	20 Hours
Truck	30 Hours

If the vehicle you are training on meets OMV criteria for a class B license, you MUST obtain that license prior to any operation of the vehicle.

APPARATUS AUXILLARY AND SAFETY SYSTEMS

Completed Initials: _____ Date: _____

1. Radio Policies and Operating Procedures
2. Antilock Braking System (ABS)
 - a. ABS Operation
 - b. Wheels Effected
 - c. Brake Pedal Pressure during Emergency Stops
 - d. Report Malfunction if Warning Light Stays On
 - e. ABS Brake System Operational Technique

SECONDARY BRAKING DEVICES

Completed Initials: _____ Date: _____

Completed Initials: _____ Date: _____

1. Transmission Retarder
 - a. Theory of operation and normal switch position
 - b. Proper Use
 - c. Procedure for wet conditions (switch position and use/ non-use of foot pedal.
2. Remember the GVWR of the apparatus is lbs.
 - a. Operation on semi-improved surfaces (other than fully engineered surfaces) **MUST** be done with extreme care, as structural stability of the surface and underlying soil is unknown.
 - b. Soil or surfaces other than dedicated streets or highways have unknown load bearing capability.
 - c. Gravel roadways or parking areas
 - d. Paved surfaces other than dedicated streets

- e. Private driveways
 - f. Sidewalks
 - g. Parking structures
 - h. Adjacent to surfaces at the top of slopes.
 - 1. Adjacent to surfaces or slopes above soil held in position by retaining walls.
 - J. Improved engineered surfaces are load rated at 500 PSI.
 - k. Apply this information to stabilization situations as well.
- 3. Carefully inspect apparatus for damage after operation on an unimproved or semi- improved surface.
 - 4. Carefully inspect between dual tires to determine if rocks or other material is caught between the dual tires after all operations on a semi-improved surface.

VERIFICATION OF OPERATIONAL STATUS OF VEHICLE

Completed Initials: _____ Date: _____

- 1. Check that the parking brake is set.
- 2. Perform DMV Pre-trip inspection.
- 3. Perform daily, weekly, or monthly assigned checks.
- 4. Knowledge of all forms that apply to the apparatus.
- 5. Performs "walk around" prior to entering cab to drive.
- 6. Equipment was secured and compartment doors closed.
- 7. Disconnect electrical cords from block heater.
- 8. Adjust seat and mirrors.
- 9. Check intercom operational and volume correctly set.
- 10. Fasten seatbelt.
- 11. All assigned personnel are seated and ready to go.
- 12. Clear to proceed.

STARTING

Completed Initials: _____ Date: _____

- 1. Locate gauges, switches and controls.
- 2. Battery and master switch on
- 3. Transmission in Park
- 4. Ignition to "ON" position, wait for glow plugs (diesels only)
- 5. Start Engine

CALIMESA FIRE DEPARTMENT

POLICY MANUAL

VOLUME 6

Policy: 606.05 Apparatus Certification Task Book

12/2023

Page 11 of 20

- a. If no start- repeat steps 1 thru 5
 - b. Maximum crank time 15 seconds, and then rest 15 seconds. Repeat 3 times. If still no start, call for repair.
6. Run engine at low for two minutes to lubricate engine & turbocharger.
7. Check gauges- DO NOT operate the vehicle if gauges are outside of normal range, high or low.
 - a. Oil pressure reading (PSI). Normal reading is PSI. Check gauges.
 - b. Voltmeter reading (Volts). Normal reading is Volts.
 - c. Ammeter reading (amps). Normal reading is Amps.
 - d. Engine temperature (F). Normal operating temperature is (F)
 - e. Transmission temperature (F). Normal operating temperature is (F)

DRIVING SKILLS

Completed Initials: _____ Date: _____ Checks that
crew is seated, and seat belts

fastened.

1. Foot on brake
2. Pre-selects appropriate gear for road and weather conditions
3. Accelerates
 - a. Light accelerator pressure to begin movement.
 - b. Ease off accelerator as desired speed is reached.
 - c. Avoids full throttle acceleration from a stop.
 - d. Consistent, smooth, and controlled
4. Braking
 - a. Anticipates stop.
 - b. Allows engine to act as a brake (down shift to achieve)
 - c. Brakes into turn- accelerates out of turn.
 - d. Leave room to go around stopped vehicles.
 - e. Consistent, smooth, and controlled
5. Considers vehicle length when changing lanes.
6. Operates vehicle with awareness of chassis and equipment overhang.
7. Choose the correct lane for driving conditions.
8. Follows all Calimesa Fire Department Policies, Procedures and California Vehicle Code regulations.
9. Turning

CALIMESA FIRE DEPARTMENT

POLICY MANUAL

VOLUME 6

Policy: 606.05 Apparatus Certification Task Book

12/2023

Page 12 of 20

- a. Plans and adjusts for extended turning radius of vehicle.
- b. Uses mirrors consistently during driving and maneuvering for positioning in turns and to monitor traffic for possible hazards.
- c. Proper hand position on steering wheel while stopped.
- d. Does not let wheel slip through hands.
- e. Avoids turning steering wheel while stopped.
- f. Uses turn signal appropriately.
- g. Starts and completes turn in proper lane.

DO NOT idle the engine for long periods of time (10 minutes or more) as damage to the turbo and injectors will occur. If idling for long periods is required by operations increase RPMs to manufacturers specifications.

SHIFITING APPARATUS WITH AUTOMATIC TRANSMISSION

Completed Initials: _____ Date: _____

1. Maintains engine speed in power range- DO NOT LUG OR OVER SPEED ENGINE.
 - a. Selects proper gear for road and weather conditions.
 - b. Manually selects lower gear when engine lugs or transmission cycles between gears.
 - c. DO NOT descend a hill in a gear higher than required to ascend.

BACKING

Completed Initials: _____ Date: _____

1. When and how to back
2. Use of emergency lights
3. Utilization of crew
4. Use personnel to always back apparatus.
5. Stop immediately if personnel backing is lost from sight
6. Communications with crew
7. Remove communication headset to hear crew outside apparatus.
8. Use proper speed when backing.
9. Avoids over steering while backing.

SECURING APPARATUS

Completed Initials: _____ Date: _____

1. Curbs wheel when on incline
2. Transmission in park
3. Check engine temperature-Normal Operating Temperature (F)
 - a. For high temperature idle
 - b. DO NOT idle the engine for long periods of time (10 minutes or more) as damage to the turbo and injectors will occur.
 - c. If idling for long periods is required by operations increase RPMs to manufacturers specifications
4. Idles engine to cool turbo if equipped (3-5 minutes) at RPM.
5. Control switches off (1) Ignition (2) Master (3) Battery
6. Wheel block down or in station apparatus room
7. Post trip vehicle inspection
 - a. Fluid leaks
 - b. Apparatus damage
 - c. Equipment missing or damaged.
 - d. Re-Supply apparatus
 - e. Clean Apparatus

POLICY MANUAL
VOLUME 6

Policy: 606.06 Training Records

12/2023

Page 1 of 1

PURPOSE

The purpose of the Training Records Policy is to ensure that all training is accurately documented. Accurate training records provide means of analyzing the departments over all training programs. Accurate trainings records provide essential information for Insurances Service Office (ISO) raters when the City of Calimesa Fire Department is graded.

POLICY

Fire personnel will document training activities done on their own such as outside training or independent training in-house into the Vector Solutions program. Company Officers will document all company training into the Vector Solutions program.

A master training plan will be developed and maintained by the Training Chief. It is the responsibility of the Training Chief to maintain, review and update the master training plan on an annual basis, ensuring that all mandated training is achieved. All training records will be maintained in Vector Solutions or Image Trend web-based program.

CALIMESA FIRE DEPARTMENT
POLICY MANUAL
VOLUME 6
Policy: 606.08 Training Requirements

1/2024

Page 1 of 1

PURPOSE

The Calimesa Fire Department training requirements will be based on National Fire Protection Association (NFPA) the Insurance Services Office (ISO) and the Occupational Safety and Health Administration (OSHA) National Wildfire Coordinating Group (NWCG) requirements and recommendations.

REQUIREMENTS

Company Training: 192 hours per year is required in accordance with the general criteria of NFPA 1001 Standard for Fire Fighter Professional Qualifications

Hazardous Materials Training: 6 hours per year is required. Training should be at a minimum awareness level in accordance with the general criteria of NFPA 472 Standard for Competence of Responders to Hazardous Materials / Weapons of Mass Destruction Incident.

Driver Training: 12 hours per year is required in accordance with the general criteria of NFPA 1002 Standard for Fire Apparatus Driver/Operator Professional Qualifications, and NFPA 1451 Standard for a Fire Service Vehicle Operations Training Program.

New Driver Training: One-time completion requirement of 60 hours.

Officer Training: The Officer Certification Requirement remains steady at 12 hours per year.

Recruit Training: Personnel who automatically get credit if their department requires state certification as an employment pre-requisite, are required to complete 240 hours.

Facility Training: This category, formerly "Training Drills," refers to training done at a training facility. A training facility is defined as a 3-story tower on 2 acres of property with some sort of burn room, smoke room, or burn prop. Personnel are required to complete 18 hours per year.

Pre-Planning Review: ISO requires one review per year.

Guideline: 606.09 Fit Testing

01/2024

Page 1 of 1

The purpose of this guideline is to ensure that all personnel are accurately fit tested each year for the health and safety of all employees.

Every staff member of the Calimesa Fire Department will be fit tested at the start of their employment and every year on their hire date.

Fit testing is to ensure all employees have a seal while wearing a Self-Contained Breathing Apparatus (SCBA).

The company office will complete the Fit Testing Form (# 402.16) on each employee and send it to the Fire Department Administrative Assistant to be filed in his or her personal record.

VOLUME 6
Guideline: 607.01 Portable Radios

1/2024

Page 1 of 1

The purpose of this Portable Radios Guideline is to outline the features and proper use of portable radios.

The best means of communication at an emergency scene is face-to-face. Face-to-face communication should be utilized whenever possible within the company or sector.

Portable radios will be used whenever distance or circumstances prevent face-to-face communication. Radio transmissions should be prioritized and concise.

RADIO OPERATION

All operations members will have a portable radio assigned for their use. Each member will be responsible for the proper use and maintenance of their radio. All radios should be checked for proper operation at the beginning of each shift/whenever necessary. Radios not functioning properly should be red tagged and Fire Resource Management notified.

Each member is responsible to carry their assigned radio on all emergency incidents. At other times the radio will be carried at their discretion or secured in the fire apparatus or station.

The use of the order model is required when transmitting or receiving messages.

Portable radio identification is as follows:

- Primary Unit Identifier (engine, truck, brush engine, water tender, etc.) will be the company officer or senior member of the assigned apparatus. i.e., Engine 1 Captain
- Engineer will apply to the driver of the fire apparatus i.e. Engine 1 Engineer
- The remaining personnel will go by their fire company ID and their seat assignment i.e., Engine -1 Medic, Engine 1 firefighter.
- Example: Engine 1 -- firefighter Jones to Command
- Single person vehicles will use their assigned vehicle ID.

Guideline: 607.02 Operating Power Saws

1/2024

Page 1 of 3

When operating power equipment under emergency conditions, accident potential is high due to adverse operational conditions. A slight miscalculation or sudden unplanned move can result in a serious accident. Performance skill coupled with the use of common sense and the strict adherence to safety procedures can prevent accidents.

PERSONNEL PROTECTION

Full protective clothing shall be worn by those members operating, and by those members in close proximity to the operation of power saws.

To prevent accidents caused by moving belts, gears, chains, blades, etc., it is imperative that operator and guide have their protective clothing completely buttoned up.

Goggles shall be in position to provide eye protection.

OPERATING GUIDELINES

Carry the rescue saw with the engine stopped, the blade frontward and muffler away from your body.

Always carry the chain saw with the engine stopped, the guide bar and saw chain to the rear and the muffler away from your body.

Keep both hands on the control handles when operating the saw. Use a firm grip with thumbs and fingers encircling the saw handles.

Make sure of your footing before operating the saw.

Whenever possible, a team of two firefighters shall perform cutting operations. The firefighter operating the saw (operator) will be assisted and/or guided by the second firefighter (guide). The guide may use the sling in which the saw is carried as a safety harness to guide and assist the operator.

The saw shall always be shut down when unattended.

Have a plan of action before putting the saw into operation; your plan should include:

1. Location and sequence of cuts and openings.
2. Wind direction. Consider its effect on the saw, exposures and personnel.
3. Your plan should provide for at least two (2) means of egress if possible.

GUIDELINE MANUAL
VOLUME 6
Guideline: 607.02 Operating Power Saws

1/2024

Page 2 of 3

Whenever possible, an officer should be present to supervise cutting operations and to assure compliance with safety procedures. The number of personnel should be limited to the minimal number required to sustain the operation. All other personnel shall be removed to a safe location until the operation is complete or assistance with the operation is needed.

Always place the safety guard in the proper position to provide protection for the use intended before operating the saw.

Power saw operations are safest when cutting on horizontal surfaces near ground level or on vertical surfaces near waist level.

Operating a power saw above chest height is extremely hazardous and should not be attempted as a normal course of action. This type of operation shall be conducted only under the direct order and/or under the supervision of an officer. The officer ordering this operation shall weigh heavily the value gained against the extreme hazard to personnel.

The use of a power saw from ladders is not recommended if there are alternatives.

The carrying strap (safety harness) shall be used to carry a saw while climbing a ladder so that both hands are free to grab the ladder rungs.

Do not operate power saws in suspected flammable/explosive atmospheres.

When operating close to highly combustible materials, use care to prevent ignition from sparks.

Side pressure or twisting of the blade when operating a rescue saw should be avoided. The saw should never be forced. If too much pressure is applied to the blade, the hazard of blade breakage (carbide tipped) or blade shattering (aluminum oxide or silicon carbide discs) is increased. A blade which breaks or shatters during cutting operations may cause serious injury to the operator, or to others in the area.

The saw cut should be only as deep as necessary. Deep cuts may weaken supporting beams and lead to collapse. The experienced operator will know when he has reached a beam by the sound and feel of the saw. The blade guard can be used to control the cutting depth of the blade (rescue saw). If conditions permit, scrape gravel and debris from the path to be cut, in order to reduce the danger of injury from flying chips and loose materials. (It also will show the operator which way the rafters are running.)

When using the rescue saw to open metal buildings, doors, etc., where conditions permit utilize methods to eliminate the hazards of sharp edges. Consider making your cut in either an X design or a triangular design with the points bent inward.
