Policy: 301.04 Monthly Fire Extinguisher Inspection

11/2023

Page 1 of 1

The Purpose of the Monthly Fire Extinguisher Inspection Policy is to set a scheduled inspection for all fire department fire extinguishers in accordance with Cal-OSHA.

POLICY

All fire department fire extinguishers shall be inspected once a month for:

- The tamper seal to verify if it is not broken or missing.
- Ensure pull pin is in place.
- Check the pressure gauge to make sure the indicator is in operating range.
- Check for obvious physical damage, corrosion, leakage, or a clogged nozzle.

Keep track of when the fire extinguishers are inspected.

Policy: 301.05 Physical Training Safety

11/2023

Page 1 of 2

PURPOSE

The purpose of the Physical Training Safety Policy is to ensure that all fire fighters are in good health to perform their job function. The tasks that firefighters are faced with on the fire ground are extremely demanding physically. These tasks are usually performed without any warm-up and under environmentally hostile conditions. This set of circumstances is conducive to a very high risk of injury. If injuries are going to be reduced, the capacity to endure the physical demands of firefighting must be increased. The call is significantly assisted by being physically fit.

Regular physical fitness activities are very important to the total wellbeing of the firefighters. Participating in them not only helps to reduce injuries; it also increases strength and stamina - keeps our minds alert - releases various forms of personal stress and can be a key factor in the building of friendship and closeness within the crew.

It is recognized that the state of being physically fit is more important than the actual program we follow to attain that fitness. Therefore, a considerable amount of discretion is allowed in selecting a physical activity from a large menu of options. However, it is imperative that we manage our participation, discipline our actions and follow our PT goals and objectives. Equally as important is the need to follow a few specific guidelines concerning company participation in all of our physical training activities.

- All companies will do PT within their first due response area.
- PT must be a non-contact activity pursued in a safe manner.
- Always warm up thoroughly with ample stretching.
- Aggressiveness and competitiveness must be controlled.
- Conduct and behavior during PT should project professionalism.
- Only use facilities with good lighting and non-slippery surfaces.
- Never utilize a facility if people are waiting.
- Maintain a low profile by
 - o Parking inconspicuously
 - o Keeping the radios low
 - o Being courteous, quiet, and professional.
- The apparatus must be close to the activity.
- Participation must never compromise response.

These guidelines represent responsible professionalism as well as reasonable common sense. It is imperative that we all follow them. If they are ignored by a few, for their own personal gain, not only is the personal and professional liability obvious, but also the impact of their actions can cause the elimination of the program for everyone.

Physical training is an outstanding benefit, but it must be managed to be successful.

It will take the conscious effort of each individual, as well as the close supervision of the Company Officer, to ensure that the guidelines are followed. The Fire Chief / Duty Battalion Chief must approve arrangements contrary to these.

Policy: 301.06 Personal Injury Reporting

11/2023

Page 1 of 1

PURPOSE

The Personal Injury Reporting Policy is designed to provide guidelines to assist those members involved in the injury reporting process (injured personnel and their supervisors), and to provide a standard system for reporting personnel injuries.

Effective accident reporting should have a positive impact on the number and severity of injuries experienced by providing the information needed to identify the causative factors, which result in accidents. The information received through injury reports will be utilized by the training department to establish direction for the development of protective (before the fact) training programs, educational packages, safety procedures, etc.

INDUSTRIAL INJURY WHILE ON DUTY

In the event an industrial injury occurs while on duty, the following procedures should be followed:

1. If the injury requires immediate hospitalization, the member should be transported to the nearest appropriate emergency department.
2. If the injury involves possible poison or hazardous materials exposure, the member is to be transported to the closest toxicological emergency center.
3. If burn injuries require medical attention, the member should be transported to Nearest available burn unit.
4. If the injury is a non-emergency injury that needs medical attention, the member should

a. .

Notify the Duty Battalion Chief and Fire Chief, . To complete the required employee injury documents The Human Resources / Risk Management Department will be advised immediately Follow the Employee Injury Reporting guide

If an employee receives a minor injury while on duty which does not require treatment and worsens to the level of requiring medical treatment The on-duty Battalion Chief shall be required to initiate all required risk management documentation.as stipulated in the Employee Injury reporting guide to include Calimesa Form 403.07, State OF California Form 5020, State of California DWC-1
